

e-Rallye Monte-Carlo (october 12 –16, 2016)

Only for adventurers of the modern times !

This brand new event takes over from “Rallye Monte-Carlo des Energies Nouvelles” and “Rallye Monte-Carlo ZENN” (Zero Emission – No Noise) on the schedule of events organized by Automobile Club de Monaco (ACM). Open to various categories of non-polluting and CO2-free vehicles, most of them powered by electricity or hydrogen (Fuel Cell), the Monte-Carlo e-Rally will involve 35 crews starting their journey on October 12 in Fontainebleau.

Copyright ACM - Jo LILLIN

This first edition of e-Rally Monte-Carlo is another proof that Automobile Club de Monaco (ACM) is faithful to its long-term commitment of promoting renewable energies and sustainable development. Christian Tornatore, the ACM General Commissioner, reminds us that « in this area, ACM has definitely opened the way by organizing an Electric Rally around Monaco in 1995. With this new e-Rally Monte-Carlo, which is the road racing equivalent to the e-Prix for single-seaters, the idea is to start from much further away, just as the authentic pioneers of Rally Monte-Carlo did in 1911. For this modern times version of a clean rally, with zero CO2 emission, we are all very pleased, at ACM, that the entry list is full, with new generation vehicles

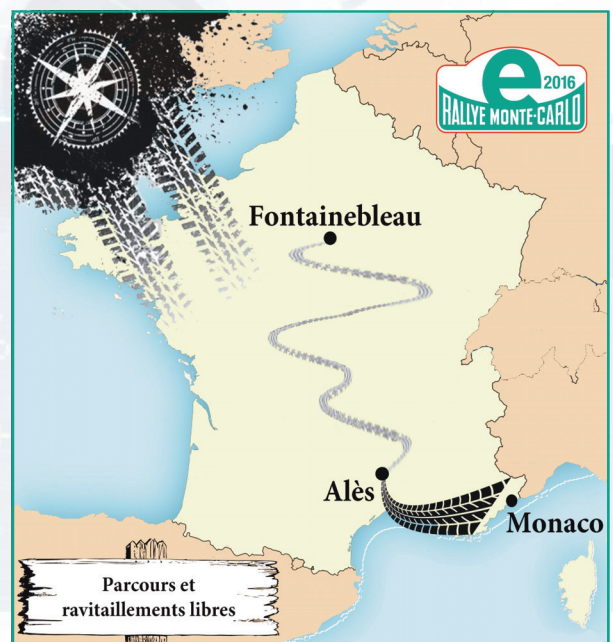

representing more than ten car manufacturers. In addition to electric vehicles entered by market leaders such as Renault Zoé, VW e-Golf, Tesla Roadster and Tesla S, Nissan Leaf, BMW i3 and Citroën Berlingo, the real stars of the show will be the hydrogen (Fuel Cell) cars. They are the ultimate clean cars and we are lucky that, for a world premiere, three Toyota Mirai and three Renault Kangoo, transformed by Symbio Fcell, will take part in this inaugural edition of e-Rally Monte-Carlo. »

The start, for 35 crews and innovative vehicles, is scheduled for next week: 2 pm on Wednesday (October 12) in Fontainebleau, in the postcard setting of a 12th Century castle, for a 1,000 km journey across French countryside, all the way to the Principality of Monaco.

Leg 1 “Fontainebleau – Circuit de Nevers Magny-Cours – Alès” will be route-free and refueling-free, with real-time GPS-monitoring of the mileage covered, in order to allow the crews to get accustomed to the autonomy of their own vehicle, depending on the choice of itinerary...

The first goal is to reach the Reloading Park, in front of Alès City Hall, before Friday (October 14) at noon, in order to avoid a penalty.

Then, starting at 1:30 pm, the crews will head for “Pole Mécanique d’Alès” where Regularity Test 1 will take place under a brand new format, on the asphalt portion of the track: one “discovery” lap followed by two regularity laps, at an average speed imposed by the organizers. The best lap will count for the general classification.

Only for adventurers of the modern times !

The journey will then continue, still route-free and refueling-free,

for Leg 2 "Alès-Monaco" including three Regularity Tests between the following locations:

- FONTVIEILLE (13) – EYGUIERES (13)
- MANOSQUE (04) – MONTMEYAN (83)
- REGUSSE (83) – DRAGUIGNAN (83)

The first crews are expected to arrive in the Principality of Monaco on Saturday (October 15) from noon onwards. After a reloading afternoon, the start of Leg 3 "Monaco-Monaco" will be given at 8:30 pm for one loop including three more Regularity Tests, run at night around the famous Col de Turini, where the legend of Monte-Carlo Rally was written and where the remaining crews of e-Rallye Monte-Carlo will fight for the win :

- MONTI – LUCERAM
- LUCERAM – MOULINET
- MOULINET – SOSPEL

The Gala Lunch and Prize Giving Ceremony will take place on Sunday (October 16) at the headquarters of the Automobile Club de Monaco.
